Epidural Positioning Device

Increase your efficiency in operating rooms, labor and delivery suites, pain centers, or anywhere epidurals and spinals are performed. The Epidural Positioning Device (EPD) allows you to position patients correctly and comfortably by encouraging cervical, thoracic and lumbar flexion while maintaining a solid and stable position. The chest is supported so the back is immobile.

The EPD Package combines the Epidural Positioning Device (EPD) with the convenient EPD Stand. Designed for use in delivery suites, pain centers and any area where operating room table clamps are not available. The stand provides an adjustable mount for the EPD and features a built-in clamp allowing for the same range of adjustment as an OR table.

"I find that the Epidural Positioning Device is a tremendous help in the placement of epidural catheters for our thoracic surgery practice. It holds my patients securely so they can relax without movement. It also frees the circulating nurse to carry out other tasks during the placement procedure. We use it in the operating room and also in our holding area. It has increased our efficiency dramatically."

Gloria Allen, BSN, RN, CNOR New York Presbyterian Hospital

Labour Delivery Stand

Designed specifically for areas where an OR table with clamps is not available, this convenient stand provides an adjustable mount for the EPD and features a built-in clamp allowing for the same range of adjustment as an OR table. To aid in positioning the patient, and for patient comfort, it also has an adjustable foot rest.

This?

Or this?

Re-think patient safety

A revolutionary device for positioning patients safely and comfortably during epidural procedures. Improper patient positioning is the number one cause for lawsuits in the operating room.

Features & Specifications

180° Adjustable Face Rest

- ✓ Tilts to attain and maintain proper cervical flexion

Adjustable Torso Support

- ✓ Increase lumbar and thoracic flexion with simple adjustments; chest support immobilizes back

6 Position Adjustable Arm Rest

- ✓ Adjustable range from the floor 31.5" - 43". Allows patient to rest arms comfortably; provides added stability

Positive Locking Clamp

- ✓ Easily adjusts; locks with one turn

7 Position Adjustable Foot Rest

- ✓ Adjustable range from the floor 10.5" - 19.5" accommodates a wide range of body sizes

High Quality Casters

- ✓ Easily lock into place

SPECIFICALLY DEVELOPED FOR USE IN

- ✓ Operating rooms
- ✓ Labor and delivery suites
- ✓ Leading educational institutions
